Ref: Status Report on Dellar Landfill Closure Plan

Dear Mr. Del Frate:

The May 23, 2008 letter from the Regional Water Quality Control Board requires submittal for review 30% completed engineering design drawings of the closure plan for the Dellar Landfill by August 15, 2008. The City anticipates completing the engineer drawings the end of August.

Access to the Dellar Landfill property is necessary to update the survey information in order to complete the required drawings accurately. We are advised by SCS Engineering, the consulting engineer for the project that a minimum of two weeks is necessary to complete the survey and prepare 30% Design Engineering Drawings showing the closure plan.

A source of the soil needed to construct the closure plan has been identified and the City is working with Dellar Trust to stock pile the material on site.

The City will continue to work with the Dellar Trust in completing the engineer drawings of the closure plan to cap and grade to drain the site.

At this time we request on behalf of the City and Dellar Trust a two week extension to complete the engineer drawings 30% complete and submit them to the Regional Water Quality Control Board for review.
